SUMMARY

MERN Developer and **B.Tech CSE final-year student** focused on building secure, scalable web solutions. Developed and deployed **Yachika@JMIETI**, a grievance management system built with strict JWT authentication and role-based access control, built to handle real institutional complexity. Built **FitCheck**, an AI resume intelligence platform with two modules: *Rezer*, which scores resume-to-JD match and surfaces missing keywords and fixes, and *TarobPrep*, generates skill-gap analysis, interview questions, and a week-by-week prep plan. Design-to-deployment, end to end.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), C++, HTML5, CSS3, SQL (basics)
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap, TailwindCSS, TypeScript
- **Backend & Database:** MongoDB, REST APIs, JWT, Bcrypt, Cloudinary
- **Developer Tools:** Git, GitHub, Postman, Render, VS Code
- **CS Fundamentals:** Data Structure & Algorithms, OOPS, DBMS

SOFT SKILLS

Problem-Solving, Teamwork, Innovative & Creative, Collaboration, Communication, Adaptability, Responsive Design, Quick Learner, Inquisitive and Explorer.

PROJECTS

Yachika@JMIETI : Smart Complaint Management System

Github Live

(MERN, Bootstrap, JWT, Bcrypt, REST APIs, Render, Cron jobs)

- Developed a MERN-based grievance platform featuring secure REST APIs, 3-tier RBAC (Student, Admin, SuperAdmin) and administrative modren tools including student suspension and appeals handling.
- Automated SLA enforcement, using Node.js cron jobs to escalate complaints unresolved after 7 days, a dynamic notification system powered by a database to keep the student updated and anonymous submissions feature.
- Optimized admin dashboard with useMemo and useCallback to make client-side searching, multi-filter sorting, pagination and one-click Excel export.

FitCheck: AI-Powered Resume Intelligence and Prep Platform

Github Live

(MERN, Tailwind CSS, JWT, Bcrypt, REST APIs, Gemini API, Zod, Cloudinary, Render)

- Built a full-stack platform with two tools: **Rezer**, which scores resume-to-JD match using a custom LLM rubric and flags missing keywords with prioritized fixes, and **TarobPrep**, an interview coach generating skill-gap analysis, practice questions, and a week-by-week prep plan.
- Engineered a Node.js/Express backend with Gemini LLM integration and Zod-validated structured output, using anti-hallucination/anti-injection constraints for reliable parsing.
- Designed indexed MongoDB schemas and integrated Cloudinary for authenticated resume storage, with JWT-based auth shared across both tools under a unified dashboard.

CLASSORA : Smart Digital Assignment Management System

[In Progress] Github

(MERN, JWT, Bcrypt, Bootstrap, REST APIs ,...)

- **Building a MERN-stack platform** enabling digital assignment submission and evaluation with JWT authentication for secure Student, Faculty, and Admin access.
- **Engineering Node.js/Express REST APIs** to process high-frequency digital submissions, integrating a **rule-based automated evaluation engine** that analyzes assignment's content and generates suggested marks, reducing manual grading effort for teachers.
- **Building a state-driven React UI,** for assignment tracking, submission management, and evaluation workflows.

TRAININGS & INTERNSHIPS

MERN Stack Development Training - Meander Software

- July to August 2025

- Completed a certified MERN Stack training program, building dynamic single-page applications using React.js, modern JavaScript (ES6+), React Hooks, reusable components, and client-side routing.
- Gained hands-on experience across the MERN stack, including MongoDB, Express.js, Node.js, REST API integration, backend fundamentals, and collaborative coding practices.

EDUCATION

B.Tech in Computer Science & Engineering

2023 - 2027 (Expected)

Jai Parkash Mukand Lal Innovative Engineering & Technology Institute, Radaur (Affiliated to Kurukshetra University)

CGPA (till now)- 8.21

EXTRA CURICULAR & WORKSHOPS

- Participated in Smart India Hackathon, collaborating in a team to develop solution for real-world problem statements.
- Completed a 5-day MERN Stack workshop conducted by CordroidHub at JMIETI, covering hands-on MERN dev.
- Attended a UI/UX Design Principles workshop at IIT Roorkee, conducted by Thinkonomers.
